Full Stack Web Developer using the MERN stack. One year of experience developing custom, interactive, and responsive web applications after completing the UA Coding Bootcamp last September. Currently seeking a role as a Developer in a collaborative, cohesive, innovative environment where I can apply and extend my technical and web application development skills.

Technical Skills

- | | | | |
|--------------|--------------------|---------------|----------------|
| • HTML | • React | • MySQL | • Git |
| • CSS | • Redux | • MongoDB | • Cheerio.js |
| • JavaScript | • Node.js | • Postgres | • Mocha |
| • jQuery | • Express | • Passport.js | • Chai |
| • CSS Grid | • MVC Architecture | • Webpack | • Nightmare.js |
| • Sass | • RESTful APIs | • AJAX | • Heroku |
| • Bootstrap | • Handlebars.js | • Axios | • WordPress |

Projects

Adam Shimoni for Flagstaff City Council - <https://shimoniforcouncil.com/>

- Created a fully responsive landing page for a 2018 Political Nominee
- Utilized HTML, CSS, JavaScript, Node, Express, Bootstrap, and Heroku as part of my first real-world project

Mambo's Dominican Kitchen - <https://enigmatic-hamlet-25833.herokuapp.com/>

- Full MERN stack application built from scratch as my final project for a team member's restaurant
- Created a fully functional CMS portal using React for restaurant owners to easily update their menu items

ETRAC – Employee Tracking App - <https://intense-sierra-28162.herokuapp.com/>

- Designed and built a Time Management application to replace a team member's antiquated payroll system
- Engineered Node / Express server and implemented wireframe designs using the Handlebars templating engine

Compute Your Commute - <https://computeyourcommute.github.io/>

- Created an informative app that will display information about your daily commute to work
- First project utilizing REST APIs to retrieve vehicle MPG information and display directions on a Google Map

Education

The University of Arizona – Chandler, AZ

04/2017 – 10/2017
